

GLISTERS OF INNOVATION

# **Parimana Prastuti**

## **Short description:**

The seed concept of this Event aimed to sensitize the young generation who will be bearing the maximum load of climate change all over the globe. Renewable has a great future, And the Revolution has started all over the globe to maximize the use of Renewable means of Energy. So our event Focus to generate new idea for delivering Renewable Energy in widespread through aspiring minds of our young generation.

## **Introduction to the event:**

ECO Walkers has come up with an event Pratimana Prastuti for Sankalp 2k20. It aims to bring together

the young minds in a bid to solve the problems faced by India due to contamination and alternate energy profile, to come up with a solution that can be applied for the betterment of the society.

### **Registration process:**

#### **Round 1:-**

All the registered teams should submit an abstract at [clubre@nist.edu](mailto:clubre@nist.edu) of their ideas they wish to present in Netra, which should not exceed 500 words. It should present your perspective as well as address all the issues pertaining to the problem statement. The abstract, which includes the references, the idea proposed with figures (if needed) should be sent in doc / pdf format only.

#### **Round 2:-**

Participants to come up with innovative ideas & technologies related to above addressed problems. We will accept participation in two categories i.e. Participants have the option to come up with.

➤ Aprototype/working model or

➤An idea/a non- working model to be presented before a panel of judges during Netra Sankalp20.

Participants of these two categories will be evaluated separately and independently

**Problem statement:**

The problem statement comprises of following domains:-

1.Agriculture

2.Solid or liquid waste water Management

3.Energy optimization

4.Renewable Energy model
