

# SANKALP

## 2020

GLISTERS OF INNOVATION

# THE PAIR CHALLENGE

## **Short description:**

This event requires good coding skills and analytical skills. This will test the documentation as well as the coding and logical skills of the programmers.

For this event students need to come in pairs.

## **Introduction to the event:**

It involves two rounds. Students need to come in pairs.

### **First Round:**

1. It will be riddle solving round.
2. Folders will contain a text file which will have a riddle in it. The answer to the riddle will be the encrypted password for the next folder.
3. This event will contain 5 levels. The team reaching the folder containing the final clue and successfully decoding it within the given time limit will move to the next round.

### **Second Round:**

- 1.The team will contain pair of participants. Each team will be given two separate set of questions one set for each member.
- 2.Each member will continue to solve his own set of questions until the half time after which the members will swap their positions.
- 3.Now the team members will again have to understand the question as well as the partial code written by his teammate and complete the remaining code.
- 4.The team which completes all the given questions first will be the winner.
