GLISTERS OF INNOVATION

NAKSHATRA DARPAN

Short description

This is a astrological gallery

Introduction to the event

An event started last year which would actually give us an astronomical tour in campus. It is a temporary exhibition where the visitors will gain witness the prototype of various satellites, rovers, etc. This time, it is based on a specific theme of 'Lunar Exploration'. The gallery would help us in getting a clear picture of the surface of moon, its craters, the various rovers which landed on the surface of moon and many more. The club is trying to portray the moon's civilization. This would surely attract lot of people's attention.
