GLISTERS OF INNOVATION

YANTRA PARIDHI

Short description

This is a model presentation event. Its main focus is to implement the theoretical knowledge in to practical by conducting a range of experiments. This initiative would help all the visitors to get a brief idea on the mechanism and phenomenon of various astronomical events.

Introduction to the event

The participants need to present a working model which must be based on the topics related to astronomy and physics. Only working models are eligible for the event. The faculties will be given the charge of judging the students on the basis of following criterias:

- their explanation
- idea
- presentation
- the working of the model
