GLISTERS OF INNOVATION

DISHA RAHI

Short description

This is basically an astro-hunt where the students conquer successive rounds by the help of given clues. It is a fun event combined with technical skills.

Introduction to the event

This event occurs in the form of groups where the team must consist of 5 members. This event will be conducted in multiple rounds to decide the winner team.

Preliminary round

A quiz will be conducted for the different teams and best 20 teams will be selected. This is basically an elimination round.

Intermediate round

In this round, the team members need to design a water rocket for their team for which they will be given around 30 minutes. Short demo will also be provided.

Final round

The winner will be decided by the launch of water rocket. Greater the distance, higher the chance of winning.
